

My Favourite Things App

Lalaine Siy
Prof. Trevor Van Rys

Development Roadmap

Pre-development notes

- always write everything down before coding
- understand your goals for coding
- make notes for what you're coding
- do not overcomplicate

Welcome Page

- the *here* button will call the 3 elements when clicked
- use hide/show
- create classes for each and build them in JS
- hide the welcome page and show my "3 favourite things" buttons

Click events

- create the data.json file with:
 - image
 - Title of the favourite thing
 - Description and why I love it

JS

- make sure you have a fetch/error thing
- retrieve data, json file

CSS/SASS

- create styles/vars for each object

Mood board
